

# Preserve Our U-Pick - Green Space

## Petition for Rezoning

We, the undersigned, support and request that the area known as the "Sunset Strawberry Fields" and its adjacent forest area be kept in its current natural state, and that said area be rezoned as Open Space, to be kept as a natural green area for quiet enjoyment and agricultural space for the residents of Fredericton for now and the future.

This area provides farm fruit crop, u-pick services to all residents of the City of Fredericton and its many paths and trails are used by residents on a regular basis as a natural area for hiking, biking, dog-walking, X-country skiing and for enjoyment of nature. It is critical that this property be preserved as the surrounding areas are developed for residential use.
